Naveen Kashyap

Full Stack Developer

+91-8467817027 — nk1910479@gmail.com — LinkedIn — GitHub — LeetCode — Portfolio

Summary

Full Stack Developer with a strong foundation in the **MERN stack** and **microservices architecture**, skilled in building scalable web applications, REST APIs, authentication systems, and real-time applications. Proficient in **JavaScript, TypeScript, React.js, Node.js, Express.js, MongoDB, and PostgreSQL**. Familiar with **Redis, Razorpay, Docker, Socket.IO, and WebSockets**. Experienced in integrating **AI capabilities** into modern web applications and passionate about developing secure, scalable, and user-focused software solutions.

Technical Skills

Languages: JavaScript, TypeScript, Python
Frontend: React.js, Next.js, HTML, CSS, JavaScript
Backend: Node.js, Express.js, REST APIs, JWT Authentication, OAuth 2.0, Socket.IO, WebSockets
Database & Services: MongoDB, PostgreSQL, Redis
Cloud & DevOps: Docker, Docker Compose, Vercel, Netlify, Render
AI & Search: Claude, Gemini, Prompt Engineering
Tools: Git, GitHub, Postman, Thunder Client, Razorpay

Experience

Front-End Developer Intern May 2025 – Sep 2025
CODEXINTERN

- Developed responsive and reusable **React.js** components using **JavaScript, Tailwind CSS, and Bootstrap**.
- Built interactive user interfaces following modern **React.js** development practices.
- Integrated **REST APIs** to fetch, process, and display dynamic application data.
- Gained hands-on backend experience by building APIs with **Node.js and Express.js**.
- Worked with **MongoDB** for storing and managing application data and integrating it with backend APIs.
- Debugged application issues and optimized frontend functionality, responsiveness, and overall user experience.

Projects

1 - Railway Ticket Booking System — Microservices Architecture *(Ongoing)*
Node.js, Express.js, React, PostgreSQL, Prisma, Redis, Apache Kafka, Elasticsearch, Docker, Razorpay

- Built a scalable railway ticket booking system using independent **microservices** with an **API Gateway** and database-per-service architecture.
- Implemented **JWT authentication, OTP verification, Google OAuth**, role-based access, rate limiting, and circuit breakers for secure and resilient APIs.
- Designed event-driven booking and payment workflows using **Apache Kafka**, with Saga-based transaction orchestration and Dead-Letter Queues (DLQ).
- Implemented **Redis-based distributed seat locking** to handle concurrent bookings and prevent double seat reservations.
- Integrated **Razorpay** payments, webhooks and refunds, along with **Elasticsearch**-powered train/station search and autocomplete.
- Containerized the application infrastructure using **Docker Compose**, including PostgreSQL, Redis, Kafka, Elasticsearch, Kibana and supporting services.

2 - CareerAI — AI-Powered Career Platform — MERN, Google Gemini API

- Built a **full-stack AI career platform** using **MERN** and **Google Gemini API** for resume analysis, job matching, resume creation, and interview preparation.
- Implemented secure **Google OAuth authentication** and personalized user session management.
- Built **AI-powered resume creation** and interview preparation modules with **ATS-friendly PDF**.
- Developed an **AI Resume Analyzer** with **ATS scoring, keyword-gap detection**, and section-wise feedback.

3 - Streamify - Real-Time Communication Platform — MERN, WebRTC, Socket.IO, Cloudinary

- Built a **real-time communication platform** using **MERN** with **1:1 video, audio calling, and instant chat** functionality.
- Implemented real-time communication using **WebRTC and Socket.IO** with secure user authentication and call signaling.
- Integrated **Cloudinary** for secure media upload, storage, and sharing within the application.

Education

B.Tech in Computer Science & Engineering 2022 – 2026
Apollo Institute of Technology (AIT), Kanpur Nagar, Uttar Pradesh — CGPA: 7.0/10

Certifications

Microsoft Certified: Azure Fundamentals (AZ-900) Microsoft
